

SAFETY DATA SHEET

Marbofloxacin

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of the substance/mixture and of the company/undertaking

| Product name | Marbofloxacin |
|----------------|---------------|
| Product number | 73817541 |
| CAS number | 115550-35-1 |

EC number 640-416-5

1.2. Relevant identified uses of the substance or mixture and uses advised against

Uses advised against For research and development purposes. Not suitable for human consumption or veterinary purposes.

1.3. Details of the supplier of the safety data sheet

| Supplier | Molekula Ltd. |
|----------|--------------------|
| | Lingfield Way, |
| | Darlington, |
| | DL1 4XX, |
| | United Kingdom |
| | +44 (0) 3302000333 |
| | info@molekula.com |

1.4. Emergency telephone number

+44 (0) 1380 725952

SECTION 2: Hazards identification

| 2.1. Classification of the subst | ance or mixture |
|----------------------------------|--|
| Classification (EC 1272/2008) | |
| Physical hazards | Not Classified |
| Health hazards | Not Classified |
| Environmental hazards | Aquatic Chronic 3 - H412 |
| 2.2. Label elements | |
| EC number | 640-416-5 |
| Hazard statements | H412 Harmful to aquatic life with long lasting effects. |
| Precautionary statements | P273 Avoid release to the environment. P501 Dispose of contents/ container in accordance with national regulations. |

2.3. Other hazards

This substance is not classified as PBT or vPvB according to current EU criteria.

SECTION 3: Composition/information on ingredients

3.1. Substances

| Product name | Marbofloxacin |
|------------------|---------------|
| CAS number | 115550-35-1 |
| EC number | 640-416-5 |
| Chemical formula | C17H19N4O4F |

SECTION 4: First aid measures 4.1. Description of first aid measures

| <u></u> | |
|---|--|
| General information | If in doubt, get medical attention promptly. Show this Safety Data Sheet to the medical personnel. |
| Inhalation | Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Loosen tight clothing such as collar, tie or belt. Get medical attention if symptoms are severe or persist. |
| Ingestion | Rinse mouth thoroughly with water. Get medical advice/attention if you feel unwell. Do not induce vomiting unless under the direction of medical personnel. |
| Skin contact | Rinse with water. |
| Eye contact | Remove any contact lenses and open eyelids wide apart. Rinse with water. Get medical attention if any discomfort continues. |
| Protection of first aiders | First aid personnel should wear appropriate protective equipment during any rescue. |
| 4.2. Most important symptoms | s and effects, both acute and delayed |
| General information | The severity of the symptoms described will vary dependent on the concentration and the length of exposure. |
| Inhalation | A single exposure may cause the following adverse effects: Temporary irritation. |
| Ingestion | May cause discomfort if swallowed. |
| Skin contact | Prolonged contact may cause dryness of the skin. |
| Eye contact | May be slightly irritating to eyes. |
| 4.3. Indication of any immediate medical attention and special treatment needed | |
| Notes for the doctor | Treat symptomatically. |
| SECTION 5: Firefighting measures | |
| 5.1. Extinguishing media | |
| Suitable extinguishing media | Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire- extinguishing media suitable for the surrounding fire. |
| Unsuitable extinguishing media | Do not use water jet as an extinguisher, as this will spread the fire. |
| 5.2. Special hazards arising fr | om the substance or mixture |

5.2. Special hazards arising from the substance or mixture

| Specific hazards | None known. |
|----------------------------------|---|
| Hazardous combustion products | Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. Carbon monoxide (CO). Carbon dioxide (CO2). Nitrous gases (NOx). Hydrogen fluoride (HF). |

5.3. Advice for firefighters

| Protective actions during firefighting | Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities. |
|--|--|
| Special protective equipment for firefighters | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents. |

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions Wear protective clothing as described in Section 8 of this safety data sheet. No action shall be taken without appropriate training or involving any personal risk. Do not touch or walk into spilled material.

6.2. Environmental precautions

Environmental precautions Avoid discharge into drains or watercourses or onto the ground. Avoid discharge to the aquatic environment.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Collect spillage with a shovel and broom, or similar and reuse, if possible. Collect and place in suitable waste disposal containers and seal securely. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dangerous for the environment. Do not empty into drains. For waste disposal, see Section 13.

6.4. Reference to other sections

Reference to other sections For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

| Usage precautions | Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Keep container tightly sealed when not in use. Avoid discharge to the aquatic environment. | |
|---|--|--|
| Advice on general occupational hygiene | Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. | |
| 7.2. Conditions for safe storage, including any incompatibilities | | |
| Storage precautions | Store away from incompatible materials (see Section 10). Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. | |
| Storage class | Miscellaneous hazardous material storage. | |
| 7.3. Specific end use(s) | | |
| Specific end use(s) | The identified uses for this product are detailed in Section 1.2. | |
| SECTION 8: Exposure controls/Personal protection | | |

8.1. Control parameters

STEL

TWA

8.2. Exposure controls

| Appropriate engineering controls | Provide adequate ventilation. Observe any occupational exposure limits for the product or ingredients. |
|-----------------------------------|--|
| Eye/face protection | Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses. |
| Hand protection | No specific hand protection recommended. Avoid contact with skin. |
| Other skin and body protection | Wear appropriate clothing to prevent repeated or prolonged skin contact. |
| Hygiene measures | Wash after use and before eating, smoking and using the toilet. Do not eat, drink or smoke when using this product. |
| Respiratory protection | Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask Standard EN140. |
| Environmental exposure controls | Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |

SECTION 9: Physical and chemical properties

| 9.1. Information on basic physical and chemical properties | | |
|--|-----------------------------|--|
| Appearance | Solid. | |
| Colour | Yellow. | |
| Odour | Not known. | |
| Odour threshold | No information available. | |
| рН | No information available. | |
| Melting point | 268 - 269°C/514.4 - 516.2°F | |
| Initial boiling point and range | No information available. | |
| Flash point | No information available. | |
| Evaporation rate | No information available. | |
| Flammability (solid, gas) | No information available. | |
| Upper/lower flammability or explosive limits | No information available. | |
| Vapour pressure | No information available. | |

| Vapour density | No information available. |
|--|---|
| Relative density | 1.55 |
| Solubility(ies) | Soluble in water. |
| Partition coefficient | No information available. |
| Auto-ignition temperature | No information available. |
| Decomposition Temperature | No information available. |
| 9.2. Other information | |
| Molecular weight | 362.36 |
| SECTION 10: Stability and rea | activity |
| 10.1. Reactivity | |
| Reactivity | See the other subsections of this section for further details. |
| 10.2. Chemical stability | |
| Stability | Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions. |
| 10.3. Possibility of hazardous | reactions |
| Possibility of hazardous reactions | No potentially hazardous reactions known. |
| 10.4. Conditions to avoid | |
| Conditions to avoid | There are no known conditions that are likely to result in a hazardous situation. |
| 10.5. Incompatible materials | |
| Materials to avoid | Avoid contact with strong oxidising agents. |
| 10.6. Hazardous decompositio | on products |
| Hazardous decomposition products | Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. Carbon monoxide (CO). Carbon dioxide (CO2). Nitrous gases (NOx). Hydrogen fluoride (HF). |
| SECTION 11: Toxicological inf | formation |
| 11.1. Information on toxicologi | ical effects |
| Acute toxicity - oral Summary | Based on available data the classification criteria are not met. |
| Acute toxicity - dermal Summary | Based on available data the classification criteria are not met. |
| Acute toxicity - inhalation Summary | Based on available data the classification criteria are not met. |
| Skin corrosion/irritation Summary | Based on available data the classification criteria are not met. |
| Serious eye damage/irritation Summary | Based on available data the classification criteria are not met. |
| Respiratory sensitisation Summary | Based on available data the classification criteria are not met. |

| Skin ensitisation Gern cell mutagenicity Summary Based on available data the classification criteria are not met. Carcinogenicity Summary Summary Based on available data the classification criteria are not met. Carcinogenicity None of the ingredients are listed or exempt. Reproductive toxicity Based on available data the classification criteria are not met. Specific target organ toxicity - regie exposure Based on available data the classification criteria are not met. Specific target organ toxicity - regie exposure Based on available data the classification criteria are not met. Specific target organ toxicity - regie exposure Based on available data the classification criteria are not met. Specific target organ toxicity - regie exposure Based on available data the classification criteria are not met. Specific target organ toxicity - regie exposure Based on available data the classification criteria are not met. Aspiration hazard Summary Based on available data the classification criteria are not met. Aspiration hazard The severity of the symptoms described will vary dependent on the concentration and the length of exposure. Inhalation As ingle exposure may cause the following adverse effects: Temporary irritation. Ingestion lantation Skin and/o | Okin consitiontion | | |
|--|-------------------------------------|--|--|
| Summary Based on available data the classification criteria are not met. Carcinogenicity Based on available data the classification criteria are not met. ARC carcinogenicity None of the ingredients are listed or exempt. Reproductive toxicity Based on available data the classification criteria are not met. | Mobility | No data available. | |
|--|--|--|
| 12.5. Results of PBT and vPvB assessment | | |
| 12.6. Other adverse effect | <u>s</u> | |
| Other adverse effects | None known. | |
| SECTION 13: Disposal considerations | | |
| 13.1. Waste treatment methods | | |
| General information | The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous. | |
| Disposal methods | Do not empty into drains. | |
| SECTION 14: Transport information | | |
| General | The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID). | |
| 14.1. UN number | | |
| Not applicable. | | |
| 14.2. UN proper shipping r | name | |
| Not applicable. | | |
| 14.3. Transport hazard cla | iss(es) | |
| No transport warning sign required. | | |
| 14.4. Packing group | | |
| Not applicable. | | |
| 14.5. Environmental hazar | | |
| Environmentally hazardous substance/marine pollutant No. | | |
| 14.6. Special precautions for user | | |
| Not applicable. | | |
| 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code | | |
| Transport in bulk according Annex II of MARPOL 73/78 and the IBC Code | | |
| SECTION 15: Regulatory information | | |
| 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture | | |
| National regulations | Health and Safety at Work etc. Act 1974 (as amended). The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 (SI 2009 No. 1348) (as amended) ["CDG 2009"]. EH40/2005 Workplace exposure limits | |

7/8

EH40/2005 Workplace exposure limits.

EU legislationRegulation (EC) No 1907/2006 of the European Parliament and of the Council of 18
December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of
Chemicals (REACH) (as amended).
Commission Regulation (EU) No 2015/830 of 28 May 2015.
Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16
December 2008 on classification, labelling and packaging of substances and mixtures (as
amended).

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

Inventories

EU - EINECS/ELINCS

None of the ingredients are listed or exempt.

| SECTION 16: Other information | | |
|--|---|--|
| Abbreviations and acronyms used in the safety data sheet | ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road. ADN: European Agreement concerning the International Carriage of Dangerous Goods by | |
| | Inland Waterways. | |
| | RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail. | |
| | IATA: International Air Transport Association. | |
| | ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air. | |
| | IMDG: International Maritime Dangerous Goods. | |
| | CAS: Chemical Abstracts Service. ATE: Acute Toxicity Estimate. | |
| | LC ₅₀ : Lethal Concentration to 50 % of a test population. | |
| | LD_{50} : Lethal Dose to 50% of a test population (Median Lethal Dose). | |
| | EC ₅₀ : 50% of maximal Effective Concentration. | |
| | PBT: Persistent, Bioaccumulative and Toxic substance. | |
| | vPvB: Very Persistent and Very Bioaccumulative. | |
| Classification abbreviations and acronyms | Aquatic Chronic = Hazardous to the aquatic environment (chronic) | |
| Classification procedures according to Regulation (EC) 1272/2008 | Aquatic Chronic 3 - H412: : Expert judgement. | |
| Training advice | Only trained personnel should use this material. | |
| Revision date | 06/10/2021 | |
| Revision | 1 | |
| SDS number | 377 | |
| Hazard statements in full | H412 Harmful to aquatic life with long lasting effects. | |
