

## SAFETY DATA SHEET

potassium hydroxide

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of	the substance/mixture and of the company/undertaking
1.1. Product identifier	
Product name	potassium hydroxide
Synonyms; trade names	caustic potash
CAS number	1310-58-3
EU index number	019-002-00-8
EC number	215-181-3
1.2. Relevant identified uses	of the substance or mixture and uses advised against
Uses advised against	For research and development purposes. Not suitable for human consumption or veterinary purposes.
1.3. Details of the supplier of	the safety data sheet
Supplier	Molekula Ltd. Lingfield Way, Darlington, DL1 4XX, United Kingdom +44 (0) 3302000333 info@molekula.com
1.4. Emergency telephone nu	umber
+44 (0) 1380 725952	
SECTION 2: Hazards identified	cation
2.1. Classification of the subs	stance or mixture
Classification (EC 1272/2008	
	<u> </u>
Physical hazards	Met. Corr. 1 - H290
Physical hazards Health hazards	Met. Corr. 1 - H290 Acute Tox. 4 - H302 Skin Corr. 1A - H314 Eye Dam. 1 - H318
Physical hazards Health hazards Environmental hazards	Met. Corr. 1 - H290
Physical hazards Health hazards Environmental hazards <i>2.2. Label elements</i>	Met. Corr. 1 - H290 Acute Tox. 4 - H302 Skin Corr. 1A - H314 Eye Dam. 1 - H318 Not Classified
Physical hazards Health hazards Environmental hazards <i>2.2. Label elements</i> EC number	Met. Corr. 1 - H290 Acute Tox. 4 - H302 Skin Corr. 1A - H314 Eye Dam. 1 - H318
Physical hazards Health hazards Environmental hazards <i>2.2. Label elements</i>	Met. Corr. 1 - H290 Acute Tox. 4 - H302 Skin Corr. 1A - H314 Eye Dam. 1 - H318 Not Classified

Hazard statements	H290 May be corrosive to metals. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H318 Causes serious eye damage.
Precautionary statements	<ul> <li>P234 Keep only in original packaging.</li> <li>P260 Do not breathe dust.</li> <li>P264 Wash contaminated skin thoroughly after handling.</li> <li>P270 Do not eat, drink or smoke when using this product.</li> <li>P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.</li> <li>P301+P312 IF SWALLOWED: Call a POISON CENTRE/doctor if you feel unwell.</li> <li>P301+P330+P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.</li> <li>P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing.</li> <li>Rinse skin with water or shower.</li> <li>P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.</li> <li>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P310 Immediately call a POISON CENTER/ doctor.</li> <li>P363 Wash contaminated clothing before reuse.</li> <li>P405 Store locked up.</li> <li>P406 Store in a corrosion-resistant container with a resistant inner liner.</li> <li>P501 Dispose of contents/ container in accordance with national regulations.</li> </ul>

## 2.3. Other hazards

This substance is not classified as PBT or vPvB according to current EU criteria.

SECTION 3: Composition/information on ingredients	
3.1. Substances	
Product name	potassium hydroxide
EU index number	019-002-00-8
CAS number	1310-58-3
EC number	215-181-3
Chemical formula	КОН
SECTION 4: First aid me	pasures
4.1. Description of first a	id measures
General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical

General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel. Chemical burns must be treated by a physician.
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. Rinse nose and mouth with water. Never give anything by mouth to an unconscious person. Get medical attention if symptoms are severe or persist.
Ingestion	Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Never give anything by mouth to an unconscious person. Place unconscious person on their side in the recovery position and ensure breathing can take place. Keep affected person under observation. Get medical attention if symptoms are severe or persist.
Skin contact	It is important to remove the substance from the skin immediately. Rinse immediately with plenty of water. Continue to rinse for at least 15 minutes and get medical attention. Chemical burns must be treated by a physician.

Eye contact         Rinse immediately with plenty of water. Do not rub eye. Remove any contact learning.           Protection of first aiders         It may be dangerous for first aiders and several to rinse for at least 15 minutes and get medical attention.           Protection of first aiders         It may be dangerous for first aiders and effects, both acute and delayed           General information         The severity of the symptome described will vary dependent on the concentration and the length of exposure may cause the following adverse effects: Severe irritation of nose and throat. Symptoms following overexposure may include the following: Corrosive to the respiratory tract.           Ingestion         May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Pain or irritation. Redness. Bilstering may occur.           Eye contact         Causes severe burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Bilstering may occur.           A. Indication of any immediate medical attention and special treatment needed           A. Indication of any immediate medical attention and special treatment needed           Statisble extinguishing media         The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.           Statisble extinguishing media         The product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has bee in contact with the product, may be corrosive.           Statisble extinguishing media			
4.2. Most important symptoms and effects, both acute and delayed         General information       The severity of the symptoms described will vary dependent on the concentration and the length of exposure.         Inhelation       A single exposure may cause the following adverse effects: Severe imitation of nose and throat. Symptoms following overexposure may include the following: Corrosive to the respiratory tract.         Ingestion       May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Severe stomach pain. Nausea, vomiting.         Skin contact       Causes severe burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Blistering may occur.         Eye contact       Causes serious eye damage. Symptoms following overexposure may include the following: Pain or irritation. Redness. Blistering may occur.         Stote for the doctor       Treat symptomatically.         SECTION 5: Firefighting measures       5.1. Extinguishing media         Sultable extinguishing media       The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.         Special hazards arising from the substance or mixture       Special hazards arising from the substance or mixture         Specific hazards       This product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.         Hazardous combustion       Their product is toxic.	Eye contact		
General information         The severity of the symptoms described will vary dependent on the concentration and the length of exposure.           Inhelation         A single exposure may cause the following adverse effects: Severe irritation of nose and threat. Symptoms following overexposure may include the following: Corrosive to the respiratory tract.           Ingestion         May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Pain or irritation. Redness. Bitstering may occur.           Eye contact         Causes servere burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Bitstering may occur.           Eye contact         Causes serious eye damage. Symptoms following overexposure may include the following: Pain. Profuse watering of the eyes. Redness.           4.3. Indication of any immediate medical attention and special treatment needed           Notes for the doctor         Treat symptomatically.           SECTION 5: Firefighting measures         Do not use water jet as an extinguishing media suitable for the surrounding fire.           Suitable extinguishing media         Do not use water jet as an extinguisher, as this will spread the fire.           Special hazards arising from the substance or mk/ture         Special hazards arising from the substance or makure           Special hazards arising from the substance or makure         Special hazards arising from the fire area if it can be done without is avoid inhalation of gases, vapours. Fumes and showse. Cool containers exposed to fitames with water spray and remove them fro	Protection of first aiders	It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.	
Inhalation       A single exposure may cause the following adverse effects: Severe irritation of nose and throat. Symptoms following overexposure may include the following: Corrosive to the respiratory tract.         Ingestion       May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Severe stomach pain. Nausea, vomiting.         Skin contact       Causes severe burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Bilstering may occur.         Eye contact       Causes severe burns. Symptoms following overexposure may include the following: Pain. Profuse watering of the eyes. Redness.         4.3. Indication of any immediate medical attention and special treatment needed         Notes for the doctor       Treat symptomatically.         SECTION 5: Firefighting media       Do not use water jet as an extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Specific hazards       This product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.         4.3. Advice for firefighters       Avoid breathing fire gases or vapours. Evacute area. Keep upwind to avoid inhalation of gases, vapours, fumes and stomes. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to filmeduite infertion water pollution occurs, notify appropriate authoritiss.         Special protective	4.2. Most important symptoms	and effects, both acute and delayed	
threat: Symptoms following overexposure may include the following: Corrosive to the respiratory tract.IngestionMay cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Severe stomach pain. Nausea, vomiting.Skin contactCauses severe burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Blistering may occur.Eye contactCauses serious eye damage. Symptoms following overexposure may include the following: Pain. Profuse watering of the eyes. Redness.4.3. Indication of any immediate medical attention and special treatment neededNotes for the doctorTreat symptomatically.SECTION 5: Firefighting measures5.1. Extinguishing mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.5.2. Special hazards arising from the substance or mixtureSpecific hazardsThis product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.Hazardous combustion productsAvoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of figases, vapours, furmes and smoke. Cool containers exposed to the aquatic environment. Control run-off water by containing and keeping to ut. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping to ut. Avoid of severs and watercourses. If firsk of water pollution occurs, notify appropriate authorities.Special protective	General information		
overexposure may include the following: Severe stomach pain. Nausea, vomiting.         Skin contact       Causes severe burns. Symptoms following overexposure may include the following: Pain or initiation. Redness. Bilstering may occur.         Eye contact       Causes serious eye damage. Symptoms following overexposure may include the following: Pain or initiation. Redness.         4.3. Indication of any immediate medical attention and special treatment needed         Notes for the doctor       Treat symptomatically.         SECTION 5: Firefighting measures         5.1. Extinguishing media         Suitable extinguishing media         Suitable extinguishing media         Do not use water jet as an extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media         Do not use water jet as an extinguishing media suitable for thre extinguishing, which has been in contact with the product, may be corrosive.         Special hazards arising from the substance or mixture         Specific hazards         Avoid breathing fire gases or vapours.         S.3. Advice for firefighters         Protective actions during firefighting         Gases, vapours, fumes and smoke. Cool containers exposed to fiames with water until weater until weater until weater until weater spray and remove them from the fire area if it can be done without risk. Cool containers exposed to fiames with water until weater by containing and keeping it out of severs and watercourses. If risk of water pollution occurs, notify appro	Inhalation	throat. Symptoms following overexposure may include the following: Corrosive to the	
irritation. Redness. Bilstering may occur.         Eye contact       Causes serious eye damage. Symptoms following overexposure may include the following: Pain. Profuse watering of the eyes. Redness.         4.3. Indication of any immediate medical attention and special treatment needed         Notes for the doctor       Treat symptomatically.         SECTION 5: Firefighting measures         5.1. Extinguishing media       The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         5.2. Special hazards arising from the substance or mixture         Specific hazards       This product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.         Hazardous combustion products       Thermal decomposition or combustion products may include the following substances: Very toxic or corrosive gases or vapours.         5.3. Advice for firefighters       Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, furmes and smoke. Cool containers exposed to hat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate protective suit. Wear	Ingestion		
Pain. Profuse watering of the eyes. Redness.         4.3. Indication of any immediate medical attention and special treatment needed         Notes for the doctor       Treat symptomatically.         SECTION 5: Firefighting measures         5.1. Extinguishing media       The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         5.2. Special hazards arising from the substance or mixture       Specific hazards         Specific hazards       This product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.         Hazardous combustion products       Thermal decomposition or combustion products may include the following substances: Very toxic or corrosive gases or vapours.         5.3. Advice for firefighters       Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water pollution occurs, notify appropriate authorities.         Special protective equipment for firefighters       Regular protection may not be safe. Wear chemical protective suit. Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protection prive vectors and gloves) will provide a basic level of protection for chemical incidents.<	Skin contact		
Notes for the doctor         Treat symptomatically.           SECTION 5: Firefighting measures           5.1. Extinguishing media           Suitable extinguishing media           Suitable extinguishing media           Do not use water fog. Use fire-extinguishing media suitable for the surrounding fire.           Unsuitable extinguishing media           5.2. Special hazards arising from the substance or mixture           Specific hazards         This product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.           Hazardous combustion products         Thermal decomposition or combustion products may include the following substances: Very toxic or corrosive gases or vapours.           5.3. Advice for firefighters         Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, furmes and smoke. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.           Special protective equipment for firefighters         Regular protection may not be safe. Wear chemical protective suit. Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective boots and gloves) will provide a basic level of protection for chemical incidents.	Eye contact		
SECTION 5: Firefighting measures         5.1. Extinguishing media         Suitable extinguishing media         Suitable extinguishing media         Do not use water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media         5.2. Special hazards arising from the substance or mixture         Specific hazards       This product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.         Hazardous combustion products       Thermal decomposition or combustion products may include the following substances: Very toxic or corrosive gases or vapours.         5.3. Advice for firefighters       Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of severs and watercourses. If risk of water pollution occurs, notify appropriate authorities.         Special protective equipment for firefighters       Regular protection may not be safe. Wear chemical protective suit. Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.	4.3. Indication of any immedia	te medical attention and special treatment needed	
5.1. Extinguishing media         Suitable extinguishing media         The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire. <i>5.2. Special hazards arising from the substance or mixture</i> Specific hazards       This product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.         Hazardous combustion products       Thermal decomposition or combustion products may include the following substances: Very toxic or corrosive gases or vapours.         5.3. Advice for firefighters       Avoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Cool containers exposed to head with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of severs and watercourses. If risk of water pollution occurs, notify appropriate authorities.         Special protective equipment for firefighters       Regular protection may not be safe. Wear chemical protective loothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.	Notes for the doctor	Treat symptomatically.	
Suitable extinguishing mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.5.2. Special hazards arising from the substance or mixtureSpecific hazardsThis product is toxic. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Very toxic or corrosive gases or vapours.5.3. Advice for firefightersAvoid breathing fire gases or vapours. Evacuate area. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. 	SECTION & Assidental release		

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions	Wear protective clothing as described in Section 8 of this safety data sheet. No action shall be taken without appropriate training or involving any personal risk. Do not touch or walk into spilled material. Avoid inhalation of dust. Use suitable respiratory protection if ventilation is inadequate. Avoid contact with skin and eyes.	
6.2. Environmental precaution	S	
Environmental precautions	Avoid discharge into drains or watercourses or onto the ground. Avoid discharge to the aquatic environment.	
6.3. Methods and material for containment and cleaning up		
Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. This product is corrosive. Provide adequate ventilation. Collect spillage with a shovel and broom, or similar and reuse, if possible. Collect and place in suitable waste disposal containers and seal securely. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. For waste disposal, see Section 13.	
6.4. Reference to other section	ns	
Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.	
SECTION 7: Handling and sto	rage	
7.1. Precautions for safe hand	lling	
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Keep container tightly sealed when not in use. This product is corrosive. Immediate first aid is imperative. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers.	
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse.	
7.2. Conditions for safe storag	re, including any incompatibilities	
Storage precautions	Store away from incompatible materials (see Section 10). Store locked up. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Store in corrosive resistant container with a resistant inner liner.	
	Hygroscopic. Handle and store under inert gas	
Storage class	Corrosive storage.	
7.3. Specific end use(s)		
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.	
SECTION 8: Exposure control	s/Personal protection	
8.1. Control parameters		
Occupational exposure limits		

Short-term exposure limit (15-minute): WEL 2 mg/m<sup>3</sup>

WEL = Workplace Exposure Limit.

STEL

TWA

#### 8.2. Exposure controls

#### Protective equipment

Appropriate engineering controls	Provide adequate ventilation. Observe any occupational exposure limits for the product or ingredients.
Eye/face protection	Wear tight-fitting, chemical splash goggles or face shield. If inhalation hazards exist, a full- face respirator may be required instead.
Hand protection	Wear protective gloves. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Wear appropriate clothing to prevent any possibility of skin contact.
Hygiene measures	Wash after use and before eating, smoking and using the toilet. Do not eat, drink or smoke when using this product.
Respiratory protection	Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140.
Environmental exposure controls	Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## SECTION 9: Physical and chemical properties

## 9.1. Information on basic physical and chemical properties

Appearance	Solid.
Colour	White.
Odour	Odourless.
Odour threshold	No information available.
рН	pH (diluted solution): 13.5 - 5.6g/l aq. (25°C/77°F)
Melting point	360°C/680°F
Initial boiling point and range	1320°C/2408°F
Flash point	No information available.
Evaporation rate	No information available.
Flammability (solid, gas)	No information available.
Upper/lower flammability or explosive limits	No information available.

Vapour pressure	1 hPa @ 719°C/1326.2°F		
Vapour density	No information available.		
Relative density	2.044 @ 20°C/68°F		
Solubility(ies)	1130 g/l water @ 20°C/68°F		
	Soluble in the following materials: Alcohols. Glycerol Water.		
Partition coefficient	No information available.		
Auto-ignition temperature	No information available.		
Decomposition Temperature	No information available.		
9.2. Other information			
Molecular weight	56.11		
SECTION 10: Stability and rea	activity		
10.1. Reactivity			
Reactivity	May be corrosive to metals.		
10.2. Chemical stability			
Stability	Stable at normal ambient temperatures and when used as recommended. Hygroscopic. Stable under the prescribed storage conditions.		
10.3. Possibility of hazardous	reactions		
Possibility of hazardous reactions	No potentially hazardous reactions known.		
10.4. Conditions to avoid			
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.		
10.5. Incompatible materials			
Materials to avoid	Mild steel. Stainless steel. Aluminium. May be corrosive to metals.		
10.6. Hazardous decompositio	on products		
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Corrosive gases or vapours.		
SECTION 11: Toxicological in	formation		
11.1. Information on toxicolog	ical effects		
<u>Acute toxicity - oral</u> Summary	Harmful if swallowed.		
ATE oral (mg/kg)	500.0		
<u>Acute toxicity - dermal</u> Summary	Based on available data the classification criteria are not met.		
Acute toxicity - inhalation Summary	Based on available data the classification criteria are not met.		
Skin corrosion/irritation Summary	Causes severe skin burns and eye damage.		
Serious eye damage/irritation			

Summary	Causes serious eye damage.	
Respiratory sensitisation Summary	Based on available data the classification criteria are not met.	
Skin sensitisation		
Summary	Based on available data the classification criteria are not met.	
Germ cell mutagenicity Summary	Based on available data the classification criteria are not met.	
Carcinogenicity		
Summary	Based on available data the classification criteria are not met.	
IARC carcinogenicity	None of the ingredients are listed or exempt.	
Reproductive toxicity Summary	Based on available data the classification criteria are not met.	
Specific target organ toxicity	- single exposure	
Summary	Based on available data the classification criteria are not met.	
Specific target organ toxicity	repeated exposure	
Summary	Based on available data the classification criteria are not met.	
Aspiration hazard Summary	Not relevant. Solid.	
General information	The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
Inhalation	Corrosive to the respiratory tract. Symptoms following overexposure may include the following: Severe irritation of nose and throat.	
Ingestion	May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Severe stomach pain. Nausea, vomiting.	
Skin contact	Causes severe burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Blistering may occur.	
Eye contact	Causes serious eye damage. Symptoms following overexposure may include the following: Pain. Profuse watering of the eyes. Redness.	
Route of exposure	Ingestion Inhalation Skin and/or eye contact	
Target organs	No specific target organs known.	
SECTION 12: Ecological info	rmation	
Ecotoxicity	Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment.	
12.1. Toxicity		
Acute aquatic toxicity		
Summary	Based on available data the classification criteria are not met.	
Chronic aquatic toxicity		
Summary	Based on available data the classification criteria are not met.	
12.2. Persistence and degradability		

ADR/RID label

8

# potassium hydroxide

Persistence and degradability The degradability of the product is not known.

0,		
12.3. Bioaccumulative potentia		
Bioaccumulative potential	No data available on bioaccumulation.	
Partition coefficient	No information available.	
12.4. Mobility in soil		
Mobility	No data available.	
12.5. Results of PBT and vPv	3 assessment	
12.6. Other adverse effects		
Other adverse effects	None known.	
SECTION 13: Disposal consid	erations	
13.1. Waste treatment method		
General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.	
Disposal methods	Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Incineration or landfill should only be considered when recycling is not feasible.
