SECTION 4: First aid measures

4.1. Description of first aid measures

First-aid measures general	: If possible show this sheet, if not available show packaging or label. Never give anything by mouth to an unconscious person. Do not leave affected person unattended.
First-aid measures after inhalation	: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Give oxygen or artificial respiration if necessary. If breathing difficulties persist : Get medical advice/attention.
First-aid measures after skin contact	: After contact with skin, take off immediately all contaminated clothing, and wash immediately with plenty of water. Do not remove clothing if it sticks to the skin. Hydrofluoric acid (HF) burns require immediate and specialised medical attention. Symptoms may be delayed up to 24 hours, and after decontamination with copious water, damage can continue due to penetration/absorption of the fluoride ion. Always seek professional medical attention in cases of exposures to HF via skin contact, HF can be treated with a 2.5% calcium gluconate gel repeated until burning ceases. Transfer to hospital if there are burns or symptoms of poisoning. Drench the affected skin with running water for 10 minutes or longer if substance is still on skin.
First-aid measures after eye contact	: Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
First-aid measures after ingestion	: Rinse mouth out with water. Do not induce vomiting. Get medical advice/attention.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms/effects after inhalation	: Fatal if inhaled. Material is destructive to tissue of the mucuous membranes and upper respiratory tract. Cough, shortness of breath, headache, nausea.
Symptoms/effects after skin contact	: Fatal in contact with skin. May produce skin irritation, blistering, ulcers, and deep scarring. Prolonged skin contact may cause a severe effect, progressing to a delayed burn. Product can damage bones and muscle.
Symptoms/effects after eye contact	: Causes serious eye damage. Blurred vision. redness, itching, tears. stinging. More severe symptoms are also possible.
Symptoms/effects after ingestion	: Fatal if swallowed. Symptoms of ingestion include drowsiness, weakness, headache, dizziness, nausea, vomiting.

4.3. Indication of any immediate medical attention and special treatment needed

Immediately call a POISON CENTER/doctor.
