

Specification

Technical Data Sheet

| | |
|---------------------|------------------------------------|
| Product Name | Bis(cyclohexanone) oxaldihydrazone |
|---------------------|------------------------------------|

| | |
|-------------------|----------|
| Product No | 45701554 |
|-------------------|----------|

| | |
|-------------------|----------|
| CAS Number | 370-81-0 |
|-------------------|----------|

| | |
|----------------------------|---------|
| Storage Temperature | Ambient |
|----------------------------|---------|

| | |
|-------------------------|--------|
| Molecular Weight | 278.35 |
|-------------------------|--------|

Specification

| | |
|-------------------|------------------------------|
| Appearance | White to light yellow powder |
|-------------------|------------------------------|

| | |
|-------------------|--------------------------|
| Conclusion | Analytical Reagent grade |
|-------------------|--------------------------|

| | |
|-----------|------------------|
| Fe | ≤ 0.001 ppm |
|-----------|------------------|

| | |
|---------------------|----------------|
| Heavy metals | ≤ 0.001 % |
|---------------------|----------------|

| | |
|-----------------------|--------------|
| Loss on Drying | ≤ 0.5 % |
|-----------------------|--------------|

| | |
|----------------------|--------------|
| Melting Point | 206°C -210°C |
|----------------------|--------------|

| | |
|---------------|---------------|
| Purity | ≥ 98.0 % |
|---------------|---------------|

Specification

Residue on Ignition ≤0.1% (as sulfate)

Sensitiveness to copper Conforms

Solubility in water Conforms
